AMERICAN NICKEL WORKS,

Camden, N. J., Nov 14 1888

Hon D M Dox

Dear Sir

My colleagues the Terrill say to inform me that they are willing to extend the time within which the supplementary 300 000 pounds of bronze blanks may be taken to Dec. 31st. 1889 This would make both the kinds of blanks (nickel and bronze) run to the same date, and would seem likely to be convenient for both parties

Will you kindly inform the Director of the Mint to this effect, in order that if he should approve, the contract which is being prepared may be of this tenor

yours truly
Joseph Wharton
